

# Classic Coagulation

state of **the art**

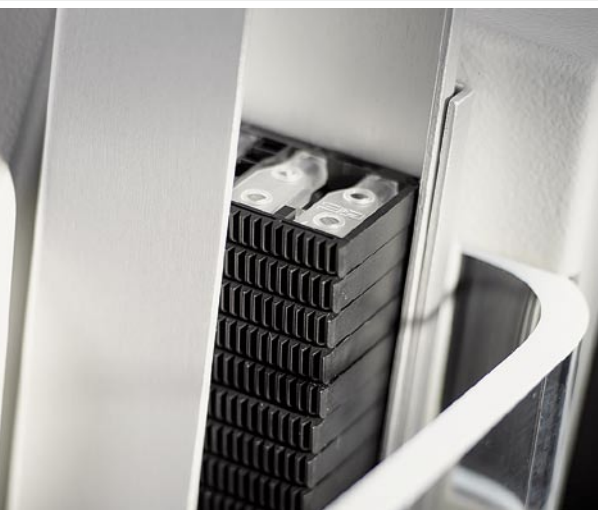

## Thrombolyzer Compact

Classic fully automated coagulation analyzer

- New Design
- Increased Throughput
- Full Traceability

## Thrombolyzer Compact

Compact's success story started in 1993, when it was one of the first fully automated coagulation analyzers on the market. Now, more than 1000 systems are still being used throughout the world. A large part of its success is due to its compact form and reliability.

- Improved sampler technology
- New software with comprehensive traceability – including reaction curves, reagent level display, QC database and the usual, intuitive user-friendly interface

By selecting the Thrombolyzer Compact, you are choosing a next-generation, fully automated coagulation analyzer which combines all the advantages of Behnk Thrombolyzer Series reliability and modern analysis techniques.

### The Compact 2 has

- Increased throughput
- Open working area for more effective handling

## The Thrombolyzer Compact 2 at a glance

Maximum sample throughput	160 tests/h
Open system	for use with almost all reagents
On-board sample capacity	32
Reagent positions (cooled)	16
Cuvettes on board	240 tests
Reloadable at any time: cuvettes, samples, reagents	✓
Operating system	LINUX
LIS Interface	RS 232 or LAN
Automatic test repetition and reflex tests	✓
Automatic calibration curve creation	✓
Measuring channels	4
Bar code scanner	sold separately
Dimensions (LxWxH)	56x55x38 cm
Weight	27.5 kg
Sound level	48 – 61 dB
Mains voltage	100 – 240 V
Frequency range	50 – 60 Hz
Power consumption	100 VA/0.34 BTU/h
Supply range	Thrombolyzer Compact, instrument accessories, computer, flat screen monitor
